

At Tulsa Medical Laboratory (TML), we understand that your practice of medicine extends beyond a simple office visit. Today's busy medical practice not only needs to manage patient health and satisfaction, it also needs to function and survive as a business, efficiently and cost-effectively.

TML can provide you with services and solutions that may assist you in your day-to-day workflow of treating patients, and managing the practice that enables you to do what you do best—practice medicine. ATLAS Physician Portal may be the order entry and results solution for you.

Order Entry— As simple as Click, Click, Done!

With ATLAS Physician Portal, placing an order for lab work can be done quickly and efficiently. With features that accommodate customized test lists and physician preferences, the system is tailored for connectivity between your EMR or PMS and the lab.

Order Entry Features

- Online order entry with medical necessity checking with ABN generation
- Automatic label generation to accompany specimens to the lab
- Ease-of-connectivity with your PMS or EMR / EHR
- Optional support for radiology and other procedures
- Optional integrated ePrescribing

Order Entry Benefits

- Time-saving office efficiencies
- Reduced phone calls to the lab
- Reduced manual input and transcription

Order Entry and Results Solution

Results Review

ATLAS Physician Portal supports specialized results delivery configurable for your office and user preference.

- Online result review can display partial, final, critical or abnormal results based on your office needs
- Customized report formats, including support for combined clinical and AP reports
- Monitor patient laboratory result trends online with customized graphical displays
- PDF and embedded image support

Features

- Fully interoperable with practice management and electronic medical record systems
- Online results review with trending of patient laboratory results
- Cumulative reports— inpatient, outpatient

The screenshot displays the ATLAS Physician Portal interface. The top navigation bar includes 'Reports', 'Orders', 'Results', 'User', 'Master Files', 'System', 'Help', and 'QA'. The patient information section shows 'WALDRON, SHANNON' with details like 'Female', '04/11/1973', '40Y', and 'SSN: 000-00-0000'. The search criteria section includes fields for Patient, Ordering Location, Reported Date Range, Resulted Date Range, Resulted Time Range, Report Status, Source, Ordering Account, Issue Type, and Only Display options. The results table below lists various tests and their statuses.
