ThyraMIR/ThyGenX TESTING STANDING ORDER

Tulsa Medical Laboratory will send the previously received RNA tube for thyroid genetic testing. A properly labeled RNA tube will be retained until the final diagnosis of the specimen sample has been rendered. Prior to release of the final cytology report, a ThyraMIR/ThyGenX procedure will be ordered on any Non-Diagnostic or Atypical thyroid cytologic specimen. The report will be faxed by Interpace Diagnostics and will also be available through Interpace Diagnostics portal for each physician.

STANDING ORDER: I request that Tulsa Medical Laboratory perform ThyraMIR/ThyGenX testing on all Non-Diagnostic or Atypical thyroid specimen samples for cytologic evaluation unless otherwise indicated on the cytology requisition not to utilize ThyraMIR/ThyGenX testing for a particular patient. I understand that this order will remain in effect until a written request for termination is received by Tulsa Medical Laboratory. By signing below, I accept the terms of this agreement.
