UROVYSION TEST STANDING ORDER

Tulsa Medical Laboratory will send an aliquot for ancillary UroVysion Testing. A properly labeled aliquot of specimen will be retained until the final diagnosis of the specimen sample has been rendered. For example, under 100cc's of specimen – 20cc's will be retained, over 100cc's of specimen – 30cc's will be retained. Prior to release of the final cytology report, a UroVysion procedure will be ordered on any Non-Negative urine cytologic specimen. It will be reflected not only in the source section of the report but also at the bottom of the cytology report with a statement of "procedures/addenda" ordered. The procedure will be completed as soon as results are received from the reference laboratory. A final report with procedure completion will be printed/faxed.

STANDING ORDER: I request that Tulsa Medical Laboratory perform UroVysion testing on all Non-Negative urine specimen samples for cytologic evaluation unless otherwise indicated on the cytology requisition not to utilize UroVysion testing for a particular patient. I understand that this order will remain in effect until a written request for termination is received by Tulsa Medical Laboratory. By signing below, I accept the terms of this agreement.
