### HIGH RISK HPV TEST STANDING ORDER

The American Society for Colposcopy and Cervical Pathology (ACOG) recommendations for the follow up of ASC-US state, " When liquid-based cytology is used or when co-collection for HPV DNA testing can be done, reflex HPV DNA testing is the preferred approach." At Tulsa Medical Laboratory we offer in house testing for high risk HPV giving you an opportunity to request testing on any or all of the following diagnoses:

**REFLEX TESTING FOR ABNORMAL PAPS:**

ASC-US\_\_\_\_ LSIL\_\_\_\_ HSIL\_\_\_\_ EGAC (endocervical atypia)\_\_\_\_

Please indicate the frequency of HPV testing that you want by marking one of the following:

12 months\_\_\_\_ 9 months\_\_\_\_ 6months\_\_\_\_ 3 months\_\_\_\_ always test\_\_\_\_

IF HIGH RISK HPV POSITIVE REFLEX TO GENOTYPING FOR 16/18 AND 45\_\_\_\_\_

RELEX TO GENOTYPING FOR 16/18 AND 45 ONLY ON ASC-US CASES THAT ARE HR HPV POSIITVE\_\_\_\_\_

CO TESTING\_\_\_\_ (routine testing at three year intervals for women age 30 -64, pap plus HR HPV)

\*IF pap result is negative and HR HPV is positive, the specimen will be reflexed to Genoytping for 16, 18/45.

CO TESTING\_\_\_\_ (routine testing at five year intervals for women age 30-64, pap plus HR HPV)

\*If pap result is negative and HR HPV is positive, the specimen will be reflexed to Genotyping for 16, 18/45.

**STANDING ORDER:** I request that Tulsa Medical Laboratory perform high risk HPV testing on patients with the above indicated diagnosis and time frame, from the residual Thin Prep Pap Test liquid. I understand that this order will remain in effect until a written request of termination is received by Tulsa Medical Laboratory.
